

## resume michel labrie

associate, director of sustainable design, maibc, moaq, leed® accredited professional

**BIO** Michel brings to our firm more than 10 years experience in green building research and sustainable architectural projects. He has served as a board/committee member for the AIBC Energy + Environment Committee and the Ecodesign Resources Society and is currently on the advisory board for the Sustainable Building Centre. As a green building specialist, Michel was instrumental in developing the RAIC's Sustainable Design of Canadian Buildings 101 Course, and has served as a green consultant to architectural firms, the Canada Green Building Council and the Greater Vancouver Regional District (GVRD). Our clients benefit from Michel's extensive experience working on significant sustainable design buildings and projects, including a Green Building Municipal Tool Kit for the CaGBC and a Green Building Educational Tour and Report for the Regional District of Nanaimo. He has helped author a number of green building educational documents including the CMHC Report: Strategies for Alternative Energy Use, and Redistribution at the Building Envelope and Resource Efficient Building Products Directory (Third Edition) for the GVRD. Michel is currently an adjunct professor at the School of Architecture at the University of British Columbia and an instructor at British Columbia Institute of Technology. Michel oversees and manages the firm's sustainable design strategies for various projects including sustainable design research and 'green' building projects.
