Overview

- Background
- Bike Facility Improvements
- Q&A

Background

- Coordination with Street Maintenance Program

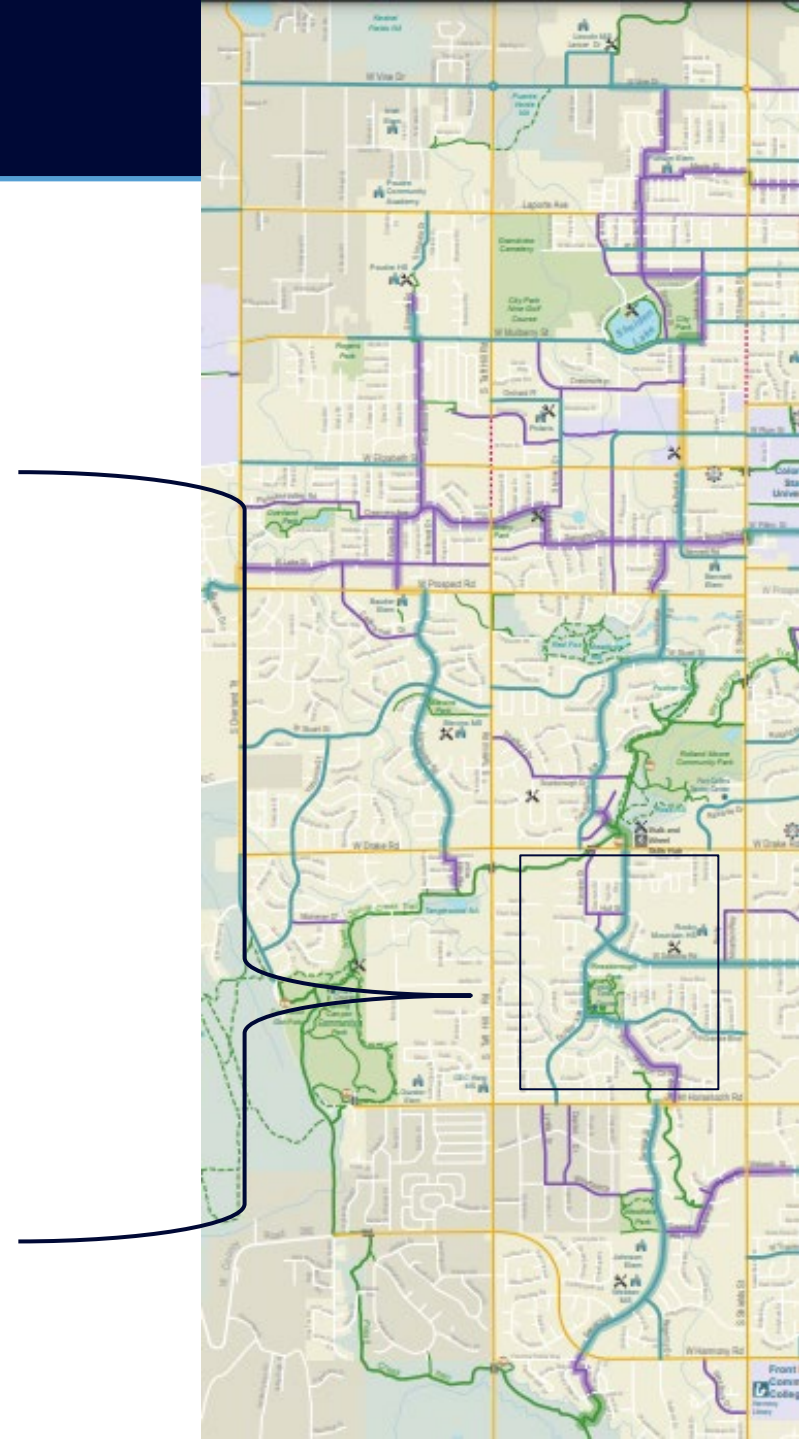

2023 Street Maintenance Projects

■ Concrete Slab Repair	■ Asphalt Surface Treatment	■ Schools
■ Asphalt Overlay	■ City Limits	■ Natural Areas
■ Reconstruction	■ Parks	

Background

- Low-stress bicycle network

Existing Deficiencies

- ~11 ft combined parking/bike lanes
 - Standard parking lanes are 8 - 9 ft and the bike lane minimum standard is 5 ft
 - Risk of “dooring” (when a driver opens their car door and hits a cyclist)

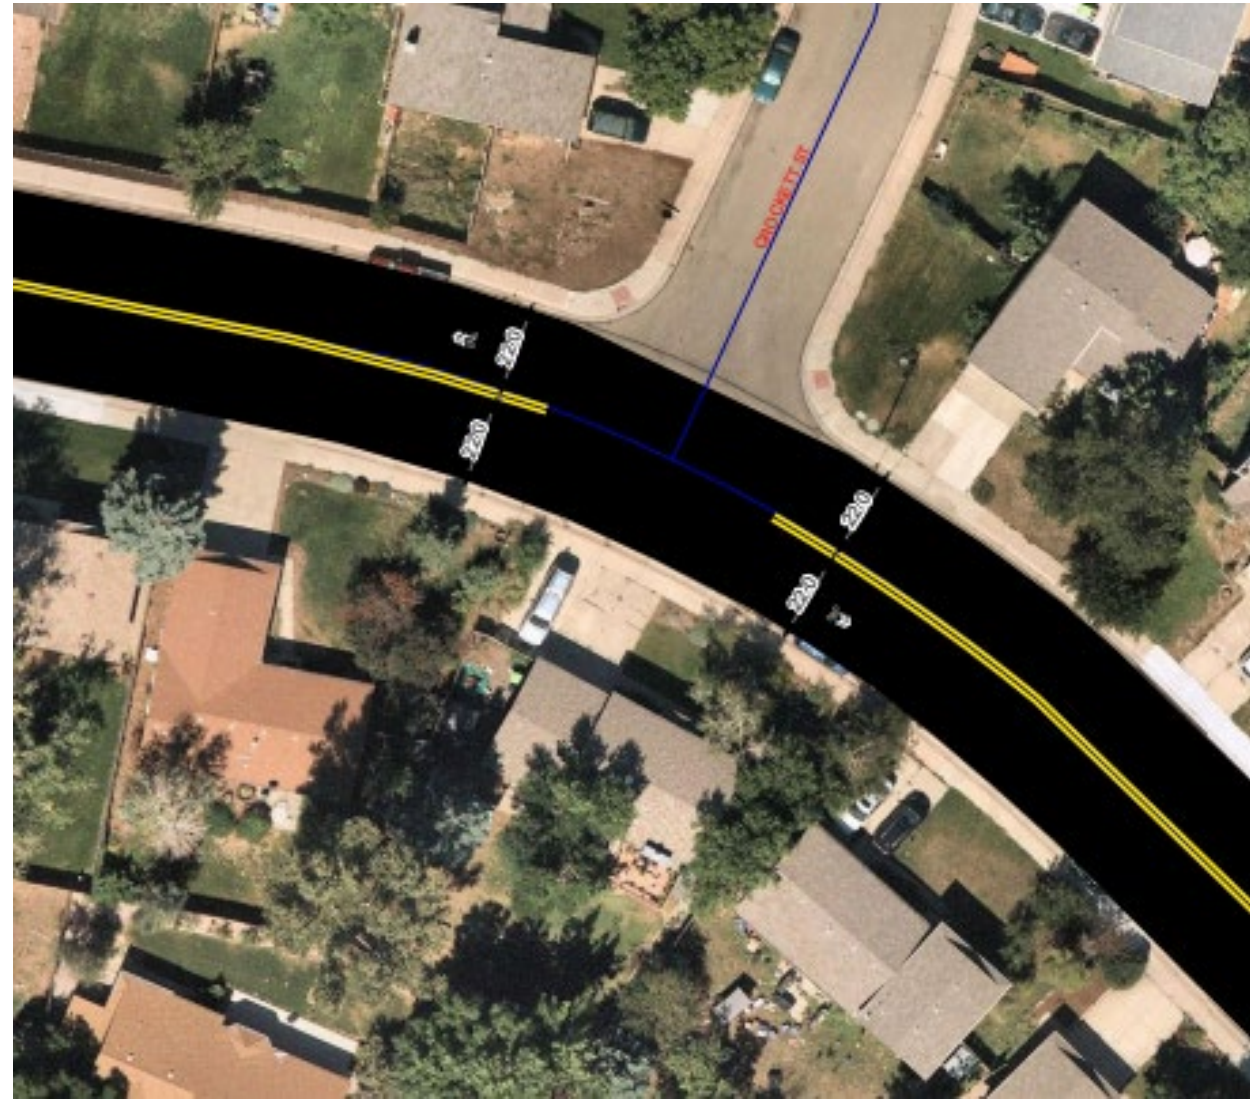

Restriping – Dunbar Ave. to Sam Houston Cir.

- Buffered bike lanes
- Requires parking removal on north side of street

Restriping –Sam Houston Cir. to Shields St.

- “Sharrows” (shared lane markings)
- Parking allowed on both sides of street
- Parking/bike lane lines removed

THANK YOU!
