77¢ / DAY
to keep a hot tub warm

19¢ / DAY
to run a refrigerator

2¢ / DAY
to run a router

LITTLE CHANGES MAKE A BIG DIFFERENCE

MAXIMIZE YOUR SAVINGS DURING ON-PEAK HOURS

Take control of your electric bill.

- **Shift** use to off-peak times.
- **Use** less during on-peak hours.
- **Reduce** your overall electric use.

Remember, with TOD pricing, **when** you use electricity is as important as **how much** you use.

Did you know a lot of electronics use electricity even when turned off? Use power strips to avoid wasting 'vampire' power.

Also, charge electronics and EVs overnight to take advantage of off-peak prices.

Adjust the setting on your thermostat a few degrees lower in the winter months and a few degrees higher in the summer months. (The U.S. Department of Energy, *energy.gov*, recommends the above settings.)

Run your dishwasher and clothes dryer in the morning, later in the evening/night or on weekends. Another option is to hang dry your laundry. And, remember to always run full loads.

Use smaller appliances like a microwave, slow cooker or toaster oven, when possible.

Enroll your electric water heater in Utilities' Peak Partners Program to automatically shift when your water is heated and save money.
